I am an undergraduate Information Systems student at the University of São Paulo, passionate about Cybersecurity, Competitive Programming, Open-Source Software, and Linux.

Education

University of São Paulo (USP)

B.Sc. in Information Systems

São Carlos, SP, Brazil

expected Mar 2028

Skills

Languages: Brazilian Portuguese (Native) and English (Advanced)

Programming languages: Python, C++, C, Shell Script, HTML/CSS, JavaScript

Tools: Visual Studio Code, Git, BurpSuite, React, Github, Gitlab, Vim, Docker, Linux.

Experience

Software Engineering Intern - Undergraduate Research

University of São Paulo

Mar 2025 – Present

São Carlos, SP, Brazil

- Contributed to refactoring PyMR, a Python framework for Magnetic Resonance experiments, by fixing bugs and improving code readability, modularity, and performance.
- Collaborated with a team of 5+ researchers using Git and the Gitflow workflow.
- Studied CI/CD pipelines to streamline future development processes.

Google Summer of Code

University of São Paulo

May 2026

- Selected for a 3-month **Google Summer of Code** project, contributing to **Pwndbg** (a GDB/LLDB plugin) by enhancing Android debugging capabilities and developer workflows.

Extracurricular Groups

• GEMA (Feb 2025 – Present)

- GEMA is a study group focused on competitive programming, aimed at preparing members for contests like the International Competitive Programming Contest (ICPC).
- Study advanced algorithms and data structures to enhance problem-solving skills for contests such as the ICPC.

• Ganesh (Aug 2024 – Present)

- Participated in studies on web security and computer networks. Competed in multiple Capture the Flag (CTF) events, applying offensive security techniques in team-based challenges. The CTF team is currently ranked as the top team in Brazil on CTFtime.

• GELOS (Jan 2024 – Present)

- GELOS is a non-profit organization committed to promoting free software culture and open source technologies. With the group, I gained extensive hands-on experience using Linux systems and deepened my understanding of open source ecosystems.

Achievements

- 4th Place out of 55 teams, Gold Medal - São Paulo State Programming Marathon (MPP) 2025
- 15th Place out of 66 teams, Bronze Medal - ICPC Brazilian Finals - 2025
- 1st Place - Tempest Academy CTF 2024
